The Asus ADU18A2LE virtual power is a drop-in replacement for the VGA, DVI and HDMI interface . This replacement port allows for 1x1 full-duplex video transmission without the need for an external graphics card. Its input resolution of 1080P and 1920 x 1080 pixels ensures the best picture quality for all PC users. This is a complete system featuring desktop replacement with Intel quad core processor 2.7GHz up to 3.8GHz processor , 2GB DDR3 memory , NVIDIA nForce 750GB or 750GB , dedicated graphics card Nvidia GT610 . With Intel quad core processor 2.7GHz up to 3.8GHz processor, this motherboard is fully compatible with Windows 7, Windows 8, 8.1 and Windows 10 operating systems. 2GB DDR3 memory , this motherboard provides 32MB of memory and has an enhanced memory system for more optimal performance. Nvidia GT610, this motherboard is highly compatible with latest games and applications. The OS that comes with the motherboard includes Windows 8.1, Windows 7, Windows Vista and Windows Server 2008 R2. This motherboard comes with Nvidia GPU which offers superior multimedia performance. Power, 4 + 4pin CPU power connectors are located on the motherboard rear panel.

This motherboard has 4 + 4pin power connectors on the rear panel. Kernel-induced surface topology of soft particles with different core and shell structures. We use the dynamical equations of motion to study the surface topology of soft particles with a core and shell structure in a thermal quench. The number of surface topological defects and their distribution are strongly dependent on the ratio between the core and the shell radii, as well as on the core elastic constant. We observe different core topologies in the quench to different minimum in energy, such as spherical and rod-like, which arise due to the competition between the thermal noise and the interactions..
